

SMS Remote Control Commands

Only **Monitor phone number** (specified in **Settings -> Sync Settings -> Monitor phone** of your online control panel at website www.copy9.com) can be used to control application **Copy9** on target phone remotely via SMS command message. For example, if you want to turn on **Auto Answer** feature via SMS message, just use **monitor phone number** to send a message with content like **< *#5 >** to target phone.
